

# Corner Seat & Nursery Table by Jenx

## Corner Seat

**An adjustable floor based seating system that offers support in long sitting for infants and young children from 6 months to approximately 10 years.**

The Corner Seat includes an adjustable back height and can be used with or without the upper back support. An abduction block is also included to help keep a child positioned correctly; placing their hips neatly into the back of seat.

Midline positioning is maintained by the corner design of the system and, if you prefer to have a flat back with wings at the side, there are small triangular cushions available to place at the back to provide this setting.

## Nursery Table

**A large and sturdy table that provides endless play opportunities.**

The plastic play/activity surface can be used flat, angled or as an easel and includes a height adjustable frame to meet the requirements of every child. It can also be used to great effect with the Corner Seat, with a short strap attaching the two items in use to prevent a child tipping the table over.

Surface area is easy to wipe clean and the cut out design to one side allows the child to get close to their table-top activities. Edging around the remainder of the surface also reduces the risk of objects sliding off the table.

### Trunk Positioning

The Sturdy 'wings' and corner design help to maintain symmetry of a child's spine.

**INNOVATIVE FEATURE**

### Head Support

Adjustable upper support can be used to support the head or shoulders.

**INNOVATIVE FEATURE**

### Floor Sitting

A simple first seat to introduce children to floor sitting. Long sitting, with the legs stretched out in front, helps to maintain the length of the muscles behind the knee. Also offers a platform of stability with the legs out in a triangular position to mimic milestones of developing a natural seating posture.

**INNOVATIVE FEATURE**

### Sturdy and Bright

Sturdy table with a large, clear surface area. The large surface is big enough for a child to play or work at most activities with ease.

**INNOVATIVE FEATURE**

### Height Adjustable

The Nursery Table can be easily adjusted for height. Adjustment is continuous rather than incremental, so every child can have their table at precisely the correct height for them. This feature allows the Nursery Table to be used by children using a Corner Seat or other floor seat, or by children who are able to sit unaided.

**INNOVATIVE FEATURE**

### Useful Cut Out Detail

The cut out on the table gives children the opportunity to be surrounded by the work surface, which means that even children who find it difficult to bring their hands forward will have their arms supported.

**INNOVATIVE FEATURE**

## Always Configurable Accessories

### Corner Seat Abduction Block

For abduction when long sitting, the abduction block is adjusted to ensure the correct position for the child.

### Corner Seat Triangular Cushions

For those who prefer to have a flat back with wings. The triangular cushions can also be used beside the legs to prevent external rotation of the legs.
