

# Its all about you

When you choose the Flow X stairlift, you ensure the best fit for your home.

## Call Device

Stay connected with friends and family with up to three different telephone numbers contactable directly from your stairlift.

## Joystick

With a comfortable soft-touch grip, the integrated joystick is designed for you to fold away neatly in the armrest when not in use.

## Seatbelt

Flow X's one-handed operation seatbelt and wrap-around armrests keep you secure throughout. Having a seatbelt detection system as a standard feature ensures that you are properly secured before starting your journey.

## ASL Technology

Our Advanced Swivel and Levelling technology (ASL) allows it to be fitted on staircases as narrow as 610mm. This feature, unique to Flow X, enables your stairlift to rotate while in motion, making it one of the most versatile stairlifts in the world.

## Ergonomic armrests

Flow X's innovative armrests provide several key benefits. They have an ergonomically-tapered form, designed to give you extra support both when standing and sitting. And thanks to the unique open-access armrest position, transferring to a stairlift has never been easier.

## Single rail design

Even in cases where the staircase is narrow and steep, with a single discreet rail, the Flow X can be installed closer to the step and on either side of the staircase. Your stairlift will be less obtrusive, and your staircase remains accessible for other family members in your home.

Flow X carries me smoothly up and down the stairs and has taken a lot of hassle out of my life. It looks lovely in my home too. I would certainly recommend it!"
